Proposal Peer Review
Please rate each section according to the criteria below. Rate each section on a scale of 1-5 with 5 being the best and 1 being the worst. Consider the following questions and comment within the text for each criterion as well.

Introduction
- How well does the introduction engage the reader and introduce the background information?

- Does the introduction propose a problem or question to be answered?

- Does the introduction propose a clear hypothesis?

- How clear is the writing? Can you understand exactly what the author is proposing?

Methods
- How well would you be able to carry out the experiment based on the description provided?

- How well does the procedure actually answer or test the hypothesis?

- How well are biases or errors accounted for in the experimental design?

**Important** Please provide some comments below (or within the proposal) on how this proposal can be improved.
